Dear Paul

Sure spectrum licences: recommendation to make technology neutral

I am writing to you on behalf of the Jersey Competition Regulatory Authority (the **Authority**) to recommend Ofcom modify certain spectrum licences held by Sure (Jersey) Limited (**Sure**) to remove certain technology designations and enable the use of latest 5G technology as well as Active Antenna Systems (AAS).

These licences are:

Licence number	Uplink (base receive)	Downlink (base transmit)
0289124	890.0 – 900.0	935.0 – 945.0
0289125	1750.0 – 1770.0	1845.0 – 1865.0
	1915.0 – 1920.0	

The Authority has published an information note on its website explaining its recent decision to recommend Ofcom make a similar change to spectrum licences held by another locally licenced telecoms provider (JT).¹ The information note also explained that the Authority would accept future

¹ JCRA: Case T-094 Response to request to make spectrum licences technology neutral to enable deployment of newer technologies including 5G Information note – see here for more information.

requests from any other local licenced telecoms providers for substantially similar changes. We have received such a request from Sure.

I trust this provides enough information for Ofcom to proceed with making the requested spectrum licence changes. If you do require any further details or clarification do not hesitate to contact me.

Yours sincerely
